Contents

Part I  Network Structure

Tomography and stability of complex networks
Tomer Kalisky, Reuven Cohen, Daniel ben-Avraham, Shlomo Havlin .... 3

Spectral analysis of random networks
Sergei N. Dorogovtsev, Alexander V. Goltsev, José F. F. Mendes, Alexander N. Samukhin .... 35

A tractable complex network model based on the stochastic mean-field model of distance
David J. Aldous .... 53

The small world phenomenon in hybrid power law graphs
Fan Chung, Linyuan Lu .... 91

The optimal path in an Erdős-Rényi random graph
Lidia A. Braunstein, Sergey V. Buldyrev, Sameet Sreenivasan, Reuven Cohen, Shlomo Havlin, H. Eugene Stanley .... 107

Clustering in complex networks
Gábor Szabó, Mikko Alava, János Kertész .... 119

Equilibrium statistical mechanics of network structures
Illés Farkas, Imre Derényi, Gergely Palla, Tamás Vicsek .... 143

Information theory of complex networks: on evolution and architectural constraints
Ricard V. Solé, Sergi Valverde .... 169

Part II  Network Dynamics

Extremal properties of random structures
Eli Ben-Naim, Paul L. Krapivsky, Sidney Redner .... 191
On the analysis of backtrack procedures for the colouring of random graphs
Rémi Monasson ................................................. 215

Small-World synchronized computing networks for scalable parallel discrete-event simulations
Hasan Guclu, György Korniss, Zoltán Toroczkai, Mark A. Novotny .... 235

Critical phenomena in a small world
Matthew B. Hastings, Balázs Kozma ..................................... 257

Attacks and cascades in complex networks
Ying-Cheng Lai, Adilson E. Motter, Takashi Nishikawa ....................... 279

Part III Information Networks & Social Networks

Scholarly information network
Paul Ginsparg ......................................................... 293

Who is the best connected scientist? A study of scientific coauthorship networks
Mark E. J. Newman ................................................... 319

Information dynamics in the networked world
Bernardo A. Huberman, Lada A. Adamic ........................................ 353

Emergence of complexity in financial networks
Guido Caldarelli, Stefano Battiston, Diego Garlaschelli, Michele Catanzaro 381

Topology, hierarchy, and correlations in internet graphs
Romualdo Pastor-Satorras, Alexei Vázquez, Alessandro Vespignani .... 407

Classes of the shortest pathway structures in scale free networks
Kwang-Il Goh, Eulsik Oh, Chul-Min Ghim, Byungnam Kahng, Doochul Kim 423

Part IV Biological Networks

Characteristics of biological networks
Albert-László Barabási, Zoltán N. Oltvai, Stefan Wuchty .................. 447

Boolean modeling of genetic regulatory networks
Réka Albert ............................................................... 463

Theoretical neuroanatomy: analyzing the structure, dynamics and function of neuronal networks
Anil K. Seth, Gerald M. Edelman ........................................... 487
