

Postdoctoral positions in Theoretical Biophysics

EMORY UNIVERSITY
Atlanta, Georgia

Multiple postdoctoral positions in theoretical biophysics are available at the Departments of Physics and Biology at Emory University in Atlanta, GA, starting immediately. The incumbents will investigate information processing in biological networks, including molecular networks and neural systems, focusing specifically on identification of reduced sets of relevant structural features that endow specific biological systems with their information processing functions. PhD in Physics, Theoretical Biology, Mathematics or a related field, an exceptional scholarly record, and an intellectual maturity and independence are required. Emory University area offers a highly intellectual, high quality, and low cost living in a major U.S. metropolis. This position provides a competitive compensation package, with details depending on the incumbent's qualifications.

To apply, send CV with the publications list, one-page research statement, and names of three recommenders to Prof. Ilya Nemenman at nemenman@physics.emory.edu. Review of applications will begin immediately.

Emory University is an Affirmative Action/Equal Opportunity Employer and welcomes applications from women and members of minority groups.
